

SUSHANT ADHIKARI

Kathmandu, Nepal 44600 | wormcrackerz@gmail.com | sushantadhihari.name.np | github.com/wormcracker

SUMMARY

Backend-leaning full-stack developer with hands-on experience across the JavaScript/TypeScript ecosystem — Node.js, Express, Next.js, React — and both SQL (PostgreSQL) and NoSQL (MongoDB, Redis) databases. Comfortable working across the stack with ORMs like Prisma and Drizzle, and productive in Linux/Docker/Git environments. Currently deepening expertise in distributed systems, system design, microservices, and MVC architecture while sharpening data structures & algorithms fundamentals, and exploring practical applications of agentic AI tooling in real development workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Runtime: Node.js

Frontend: React, Next.js

Backend: Express.js

Databases: PostgreSQL, MongoDB, Redis

ORMs: Prisma, Drizzle

Tools & Platforms: Linux, Docker, Git, GitHub

Emerging Interests: Agentic AI Tooling, Distributed Systems, System Design, Microservices Architecture

PROJECTS

Market Watch github.com/wormcracker/market-watch [TypeScript · Node.js · WebSocket · REST API]

- Built a personal NEPSE (Nepal Stock Exchange) market-monitoring platform with a decoupled REST API backend and WebSocket-based frontend for live data streaming.
- Designed a custom scheduler for automated market scraping, paired with a multi-channel webhook alert system supporting Telegram and Discord.

JobSeeker github.com/wormcracker/job-seeker [React · NestJS · MongoDB · Redis · Docker · AWS]

- Full-stack job portal built with a 3-person team, featuring cloud infra, observability, and CI/CD. Owned the React frontend, MongoDB data layer, and REST API endpoints.

Folio github.com/wormcracker/folio [TypeScript · Tauri]

- Native desktop document reader built with Tauri, pairing a Rust backend with a TypeScript frontend for a distraction-free reading experience.

Music Practice Lab github.com/wormcracker/music-practice-lab

- Configurable practice workspace combining a metronome, timer, and interval trainer into a drag-resize-save layout persisted per user.

EDUCATION

Bachelor's in Information Technology

Core coursework in computer science fundamentals, software development lifecycle, and development methodologies.

CERTIFICATIONS

- Google AI Essentials — Coursera
- PostgreSQL for Everybody — Coursera

CURRENTLY BUILDING TOWARD

Distributed Systems · Data Structures & Algorithms · System Design · Microservices Architecture · MVC Frameworks
