

Sushant Adhikari

Kathmandu, Nepal – 44600 | wormcrackerz@gmail.com | sushantadhikari.name.np | github.com/wormcracker

SUMMARY

Backend-leaning full-stack developer with hands-on experience across the JavaScript/TypeScript ecosystem — Node.js, Express, Next.js, React, and both SQL (PostgreSQL) and NoSQL (MongoDB, Redis) databases. Comfortable working across the stack with ORMs like Prisma and Drizzle, and productive in Linux/Docker/Git environments. Currently deepening expertise in distributed systems, system design, microservices, and MVC architecture patterns while sharpening data structures & algorithms fundamentals. Exploring practical applications of agentic AI tooling in real development workflows.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, SQL
Runtime	Node.js
Frontend	React, Next.js
Backend	Express.js
Databases	PostgreSQL, MongoDB, Redis
ORMs	Prisma, Drizzle
Tools & Platforms	Linux, Docker, Git, GitHub
Emerging Interests	Agentic AI tooling, Distributed Systems, System Design, Microservices Architecture

PROJECTS

Active GitHub contributor — 9+ public repositories spanning full-stack apps, developer tooling, and systems projects. Full list: github.com/wormcracker

Market Watch github.com/wormcracker/market-watch

- Built a personal NEPSE (Nepal Stock Exchange) market-monitoring platform with a decoupled REST API backend and WebSocket-based frontend for live market data streaming.
- Designed a custom scheduler for automated market scraping, paired with a multi-channel webhook alert system supporting Telegram and Discord integrations.
- Explored MCP (Model Context Protocol) tooling to let AI agents query market data directly, extending the platform beyond a traditional dashboard.

TypeScript · Node.js · WebSocket · REST API

Folio github.com/wormcracker/folio

Native desktop document reader built with Tauri, pairing a Rust backend with a TypeScript frontend for a distraction-free reading experience.

TypeScript · Tauri

Local Library github.com/wormcracker/local-library

Locally-hosted media manager that scans a specified drive, indexes movies and TV shows, and presents them through a browsable interface.

JavaScript

Music Practice Lab github.com/wormcracker/music-practice-lab

Configurable practice workspace combining a metronome, timer, and interval trainer into a drag-resize-save layout persisted per user.

JavaScript

EDUCATION

Bachelor's in Information Technology

Core coursework in computer science fundamentals, software development lifecycle, and development methodologies.

CERTIFICATIONS

- Google AI Essentials — Coursera
- PostgreSQL for Everybody — Coursera

CURRENTLY BUILDING TOWARD

Actively deepening: Distributed Systems · Data Structures & Algorithms · System Design · Microservices Architecture · MVC Frameworks
